Projects

Google Books

| https://github.com/drkittendorf/21_google_books

| <https://dales-google-books-app.herokuapp.com>

Project to search and save selected titles from Google Books API

- Solo project with additional functionality to save title(s) not found in Google to a separate list.
- React, HTML, CSS, JavaScript, MongoDB, Express, Node, Heroku, GitHub

Workday Scheduler

| <https://github.com/drkittendorf/05-work-day-scheduler>

| <https://drkittendorf.github.io/05-work-day-scheduler>

- Schedule that saves daily items to local storage, color delineation for future, current and past timeframes.
- Solo project included dynamic generation of time slots based on times in an array, so it could be easily expanded to fit whatever extended timeframe is desired.
- HTML, CSS, JavaScript, jQuery, moment.js, GitHub

Space Portal

| <https://github.com/drkittendorf/totallyNotTheDarkSide>

| <https://drkittendorf.github.io/totallyNotTheDarkSide>

- Developed a source for news and images related to space travel. Updates image automatically on daily basis; Connects to 6 different Third Party APIs.
- Ideated original project concept for group, beyond conceptual design I worked primarily on back end setting up APIs.
- HTML, CSS, Materialize, jQuery, AJAX, APIs, GitHub
